

# Motion Activated Détecteur de Mouvement

- Turns on automatically with motion
- Especially valuable for children and seniors

- S'allume automatiquement suite au mouvement
- Particulièrement précieux pour les enfants et les aînés

- Enciende automáticamente con el movimiento
- De utilidad especialmente para niños ancianos

- Night Light
- Veilleuse
- Lampara

**Use it anywhere you need automated lighting:**

Hallway, bathroom, bedroom, kitchen, entrance,  
garage, basement, etc.

**How it works**

At dark, the unit turns the light on automatically after sensing moving heat sources (such as walking person or large animal) in its coverage area. When motion stops, light remains **ON** for approximately 90 seconds and then turns off automatically.

NOTE: The unit is more sensitive when motion is moving across the front (side-to-side), as opposed to straight towards the unit. When plugged in, the RED indicator will come on to confirm that the unit has power.

**How to use**

Simply plug the unit into any standard AC outlet. When initially plugged in, the light will turn on and stay on for approximately 40 seconds (warm-up period). During this time, the unit will not respond to motion.

REMEMBER: The unit will only respond to motion at night, or when the unit is in a dark area.

WARNING: THIS IS NOT A TOY AND IS NOT INTENDED FOR USE BY CHILDREN. FOR SAFE USE, PLUG ONLY INTO EXPOSED WALL OUTLETS WHERE NIGHTLIGHT IS VENTILATED AND CANNOT CONTACT BED COVERINGS OR OTHER MATERIAL THAT MAY PRESENT A FIRE HAZARD. DO NOT USE WITH EXTENSION CORDS.

**CAUTION:** TO PREVENT ELECTRIC SHOCK, MATCH WIDE BLADE OF PLUG TO WIDE SLOT, FULLY INSERT

**SPECIFICATIONS**

Operating Distance:

up to 25 feet

Detection Angle:

up to 130 degrees

Bulb:

7 Watt maximum

220V - 240V  
50 - 60HZ  
7W
