

Manual

Dear customer: Thank you to use the my plant product, this product design forerunner, good quality..For insuring you the better usage, please read this manual carefully. (this product is prohibition against to enter the water in use process,in order to prevent damage).

Function characteristics:

This product uses the import switching power supply regulator Will input DC voltage (13-40V) to output 12V after the processing transformation constant voltage, It interer has over current, over voltage, over heat, short-circuits and so on automatic protection combine can after the term recover normal work.

Main parameter:

Input voltage range: DC13V~40V

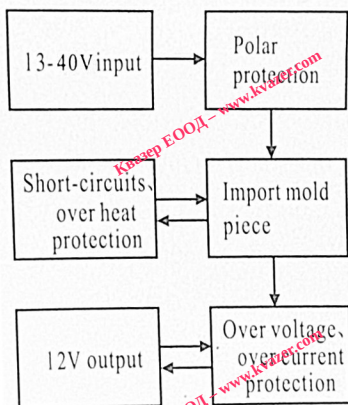

Out voltage: DC12V

Maximum output current: 5A、10A、15A、30A

Rating output voltage:60W、120W、180W、360W

Maximum operation templeture:80℃

Quiescent operation current:50mA

After-sales service:

This product from sell its day risos a year in side ifoccurrences break down, my factory will free maintain If beyond the reach of protect to fix the term or tear to seal an and artificial damage then the feeling of takes the material fee.
